

Understanding Your Residential Energy Bill

Why Do Most Residents Choose 3CE?

3CE Supports Clean and Renewable Energy at Competitive Rates

- \$4.4 million in total customer savings in 2018*
- \$12.7 million in total customer savings in 2019*
- \$32.4 million in estimated total customer savings in 2020*

3CE Delivers Economic and Environmental Benefits to Your Community

- Competitive rates help offset rising utility costs.
- Energy Programs tackle climate change and help reduce local greenhouse gas emissions through valuable incentives and rebates.
- 3CE's pathway to 100% clean and renewable energy by 2030 from new projects helps fast-track California's energy and climate goals.

What can I expect after 3CE enrollment?

3CE Electric Generation Charges replace PG&E Electric Generation Charges on your PG&E bill the month after enrollment. All eligible electricity customers receive mailed enrollment notifications 60 and 30 days prior to enrollment, as well as 30 and 60 days after their enrollment. As a residential customer, 3CE Customer Service Energy Advisors are available to answer your questions or concerns regarding enrollment.

What changes will I experience on my bill?

There will be no new charges. You will continue to receive only one electric bill. Before 3CE you received bundled service that included generation, transmission, and distribution charges in one combined rate. Your existing energy provider will stop billing generation charges once your 3CE services begins. From that point going forward, generation charges will be billed by 3CE and will be presented as a separate line item on page one and with a separate corresponding page included in the bill. Tiered, Time of Use and NEM account classes are matched by 3CE. Rate assistance programs such as **CARE, FERA, and Medical Baseline continue uninterrupted with 3CE, with no need to reapply.** **Turn over to view a sample before-and-after electric bill.**

An infographic titled "3CE's Pathway to 100% Renewable by 2030". It features a central globe with a lightbulb inside, surrounded by icons of wind turbines, solar panels, and a sun. The text includes: "Supporting Affordable Rates, Increasing Renewable Resources, and Accelerating Greenhouse Gas Reduction"; "3CE's proposed energy-supply strategy would provide the following benefits:"; "3CE would reach 60% clean and renewable energy by 2025 (5 years ahead of CA's goal) and 100% by 2030 (15 years ahead of CA's goal)"; "Financially beneficial to customers and 3CE through reduced operating costs of \$8-15 million/year which would allow for more affordable and stable rates while supporting economic development"; and "Learn more at 3cenergy.org/understanding-clean-energy/". A circular badge in the top right corner says "100% Renewable by 2030".
