SOURCING RENEWABLE ENERGY

avoided more than

445,000

metric tons of CO₂
in 2023

The equivalent of taking **105,911** gasoline-powered passenger vehicles off the road for a year.

Together, we are building a **cleaner and more reliable grid**, contributing to **healthier air**, and supporting our **local economy**.

¹ The eligible renewable percentage above does not reflect RPS compliance, which is determined using a different methodology. ² Unspecified power is electricity that has been purchased through open market transactions and is not traceable to a specific generation source. ³ Renewable energy credits (RECs) are tracking instruments issued for renewable generation. Unbundled renewable energy credits (RECs) represent renewable generation that was not delivered to serve retail sales. Unbundled RECs are not reflected in the power mix or GHG emissions intensities above.

You are receiving this notice because you were a Central Coast Community Energy customer in 2023. Receipt of this notice does not mean that your electricity generation services are currently with 3CE. The generation data highlighted in the 3CE 2023 Power Content Label is provided in the Annual Report to the California Energy Commission: Power Source Disclosure Program. Percentages may not add to 100% due to rounding.
