Rebates and Technical  
Assistance to

# ELECTRIFY

Your Transportation,  
Home, or Business

# Why ELECTRIFY?

Going electric is cleaner, more efficient, and can save money

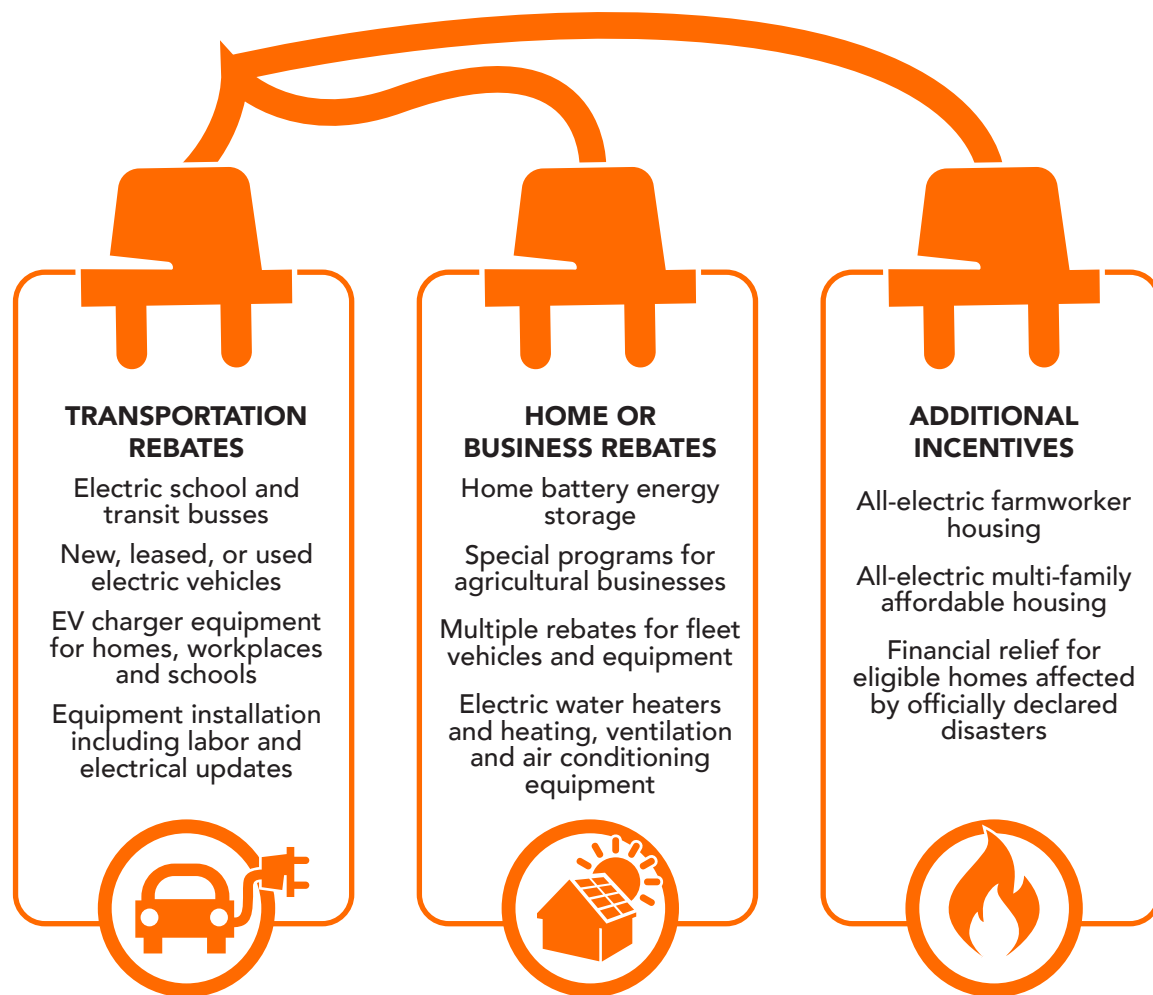

As clean and renewable energy sources like wind and solar generate more of California's electricity, electricity itself is becoming a clean source of energy.

Replacing gas-powered transportation, equipment, and appliances with clean, all-electric solutions reduces emissions and provides cleaner air inside buildings and throughout our communities. Electric products often out-perform gas products and may cost less to operate in the long run.

**Rebates and incentives make the transition easier, and more affordable**

In addition to available federal, state, and regional incentives, 3CE customers can access cash rebates when electrifying their transportation, home, or business.

## PLUG IN TO CASH REBATES

Are you ready? In addition to rebates for eligible all-electric products, 3CE provides funds for "readiness" to help households and businesses prepare for electrification by updating your electric panels.
