

...To Know More About **YOUR** Electricity Provider

LOCAL

3CE is a local public agency benefiting your community. Serving 35 Central Coast communities and more than 1.2 million people, 3CE was formed to give counties, cities, businesses, and homes more control over their electricity needs.

3CE is led by Operations and Policy Boards comprised of city and county elected and agency officials who represent the communities 3CE serves.

PUBLIC

As a public agency, 3CE is committed to transparency. All Policy and Operations Board meetings are open to the public and allow for written and oral comment.

3CE also formed a Community Advisory Council comprised of environmental, business, and community leaders to further connect the agency to community priorities. Decisions are made by your local officials, with meeting agendas posted in advance.

AFFORDABLE

3CE sets rates locally through a transparent process. Local rate-setting reflects our region's climate and the unique energy needs of our diverse Central Coast communities, and allows for input from our customers. With no investors or shareholders, 3CE's cost-based rate structure allows for simple, stable rates that support continued community reinvestment and customer benefits.

Central Coast Community Energy Gives **YOU The Power...**

Your city or county joined Central Coast Community Energy (3CE) to gain more control over its electricity needs and provide economic and environmental benefits for your community. Through innovative solutions and a commitment to clean and renewable energy, 3CE is using **POWER FOR GOOD.**

With 3CE, you receive local electric generation service, giving you the power to do more with your energy and know more about your electricity provider. (PG&E or SCE still handles delivery and billing.)

Note: Customers enrolled in rate assistance programs such as CARE and FERA, or in the Medical Baseline program, remain enrolled with no action needed and no interruption to benefits as a 3CE customer.

...To Do More With **YOUR Energy**

REDUCE EMISSIONS

As a 3CE customer, you help reduce emissions by using electricity generated from clean and renewable sources such as solar, wind, and geothermal.

3CE customers can benefit even more from our service by plugging into our energy programs, exclusive rebates and resources that help transition your transportation, home, or workplace from fossil-fuel power to clean, all-electric solutions.

BUILD A CLEANER, MORE RELIABLE GRID

3CE customers are making California's grid cleaner and more reliable. On behalf of our customers, 3CE sources electricity from new renewable energy projects and innovative energy storage facilities.

By focusing on long-term contracts, new projects, and diversified storage technologies, 3CE's procurement strategy yields higher-impact, renewable contributions to California's grid.

TOGETHER WITH OUR CUSTOMERS, WE'RE ON A PATH TO 100% CLEAN AND RENEWABLE ENERGY.

INVEST IN YOUR OWN COMMUNITY

Unlike investor-owned utilities, 3CE is a public agency. That means revenue gets invested in the communities 3CE serves and in building new renewable energy projects, not passed on to investors or shareholders.

Community investment comes in the form of responsible and fair rates, job creation and training, as well as millions of dollars in electrification incentives for 3CE customers.

ELECTRIFY YOUR TRANSPORTATION, HOME, OR WORKPLACE WITH REBATES

3CE provides rebates and technical assistance to help customers and our Central Coast community with the transition from fossil fuels to clean, all-electric solutions.

From new or used electric vehicles and charging equipment to electric water heaters and heating, ventilation, and air-conditioning equipment, 3CE's energy programs give customers the power to move, live, and grow toward a decarbonized future.

Along the way, we're improving access to clean energy by directing resources to underserved communities, funding affordable housing, and providing additional incentives to those recovering from natural disasters.
