

POWER FOR GOOD, Right Here at Home

Central Coast
Community
Energy

Here on the Central Coast, CCE provides clean electricity to power the moments that matter most. And since 2018, we've invested more than \$70 million in rebates to help our customers electrify their homes, businesses, and transportation. Together with our communities, we're using Power for Good and lighting the way to a 100% renewable future.

2024 POWER CONTENT LABEL Central Coast Community Energy			
	Electricity	Gas	Not Setting a Target
Greenhouse Gas Emissions Intensity (Short Tons of CO ₂ emitted per megawatt-hour)	0	452	500
Electricity Sources			
Renewables and Zero-Carbon Resources			
Fossil Fuels and Dispatchable Power			
100% Dispatchable Renewables	100%	50%	40%
Natural Gas	0%	50%	60%
Coal	0%	0%	0%
Nuclear	0%	0%	0%
Large Hydropower	0%	0%	0%
Small Hydropower	0%	0%	0%
Biomass	0%	0%	0%
Geothermal	0%	0%	0%
Solar	0%	0%	0%
Wind	0%	0%	0%
Unspecified Power (generally fossil fuels)	0%	50%	60%
Total	100%	100%	100%
<p>Notes:</p> <p>1. The electricity and gas intensity values are based on the Renewable Portfolio Standard (RPS), which measures the total greenhouse gas emissions of electricity generation. The RPS is a market-based system that allows for the trading of renewable energy credits (RECs) to meet the RPS requirements. The RPS is a market-based system that allows for the trading of renewable energy credits (RECs) to meet the RPS requirements.</p> <p>2. The gas intensity values are based on the California Gas Emissions Intensity (GGEI), which measures the total greenhouse gas emissions of gas generation. The GGEI is a market-based system that allows for the trading of gas emissions credits (GECs) to meet the GGEI requirements.</p> <p>3. The RPS and GGEI are both based on the 2013 California Energy Commission's (CEC) Renewable Portfolio Standard (RPS) and Gas Emissions Intensity (GGEI) targets.</p> <p>4. The RPS and GGEI are both based on the 2013 California Energy Commission's (CEC) Renewable Portfolio Standard (RPS) and Gas Emissions Intensity (GGEI) targets.</p> <p>5. The RPS and GGEI are both based on the 2013 California Energy Commission's (CEC) Renewable Portfolio Standard (RPS) and Gas Emissions Intensity (GGEI) targets.</p>
