

# EV LAUNCHPAD

## TECHNICAL ASSISTANCE PROGRAM

A comprehensive, **no-cost technical assistance** program designed to help 3CE's non-residential customers plan and implement **fleet electrification** and **charging infrastructure projects** with ease.

### AVAILABLE SERVICES

#### FLEET ELECTRIFICATION SUPPORT

Fleet transition planning, including fleet analysis, EV procurement guidance, cost forecasting, and funding strategy support.

#### CHARGING INFRASTRUCTURE PLANS

Electrical capacity assessments, load analysis, charger siting, and cost estimates for workplace, fleet, and public EV charging.

#### ENGINEERING & SITE DESIGNS

For EV charging projects - construction-ready site plans, engineering drawings and electrical designs, including single-line diagrams and power distribution.

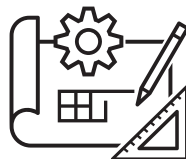

### READY TO GET STARTED?

Submit interest form on 3CE's website.

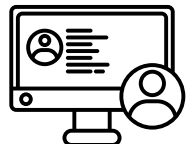

Schedule scoping call to discuss technical assistance needs.

Receive curated assistance that meets you wherever you are.

Complete project with local installers and 3CE support.

Apply for 3CE rebates once project is complete.
